Letter of Recommendation for Tyler Shelter:

I am pleased to write this letter of recommendation for Tyler Shelter, whom I have known for two years as my student in the Computer Science department. Specifically, he has taken four computer science courses from me, Data Structures, Web Programming, Android Mobile Programming, and Senior Computer Science Capstone. This recommendation is based on my sense of Tyler and his performance in these courses.

I was impressed early on with Tyler's work ethic and his ability to establish a level of comfort in with advanced concepts that are often a struggle. Tyler is always quick to begin work and will dependably achieve at least a cursory understanding of any topic.

During the last course he took from me, Senior Capstone in Computer Science, Tyler wasn't able to make many classes due to circumstances outside the course. But, by the end of the semester he was able to produce a software product that allowed him to complete a Computer Science degree. Tyler has a passion that go along with his ideas and is able to have a dialog about these ideas. More important, he is able to perceive some of the potential algorithmic problems associated with these ideas. Tyler is reliable and a good worker. I highly recommend him.

Sincerely,

A handwritten signature in black ink, appearing to read 'Patricia Cornez', is written over a light gray rectangular background.
